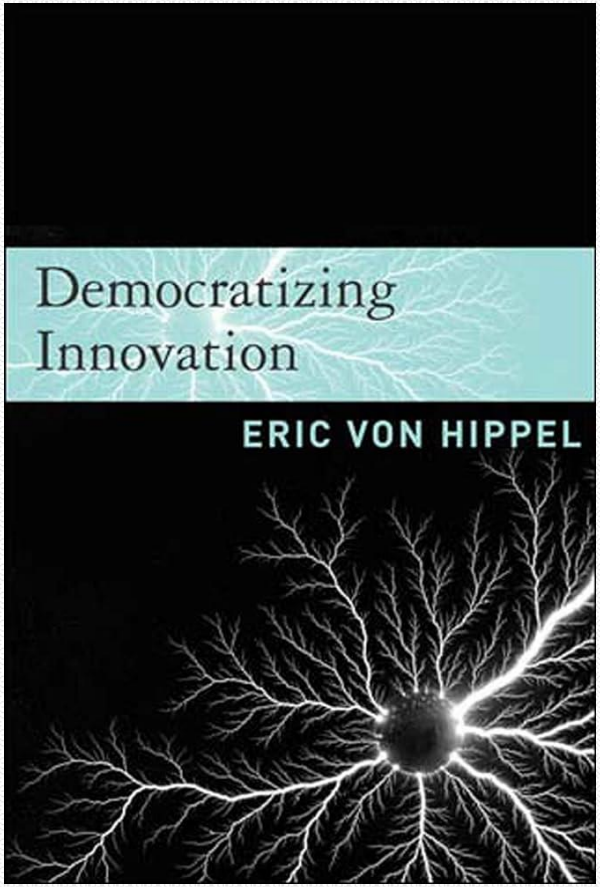
Pourquoi ?

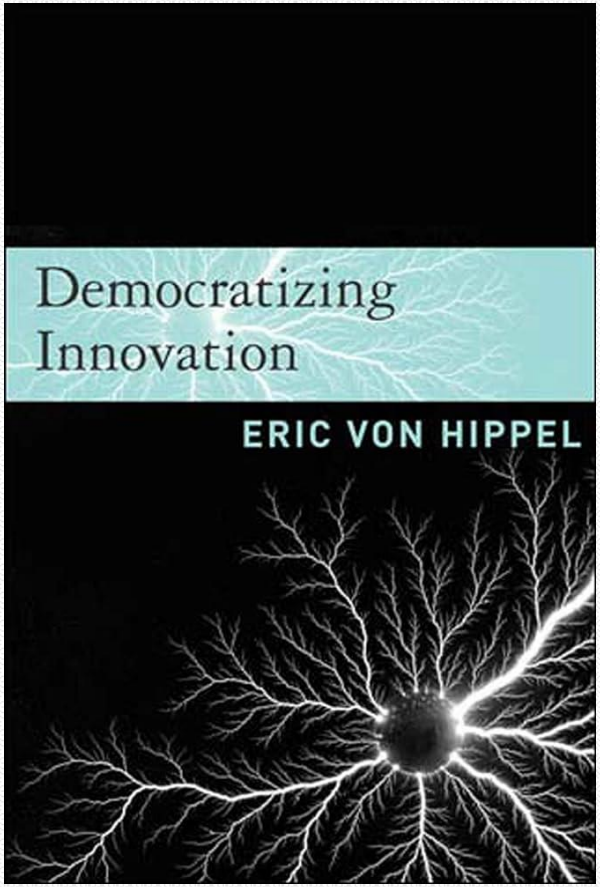
Comment?



Innovations ascendantes :

1. Un problème personnel
2. Une innovation locale
3. Partage de la solution
4. Diffusion virale (ex. code informatique copié / partagé)
5. Connexion au marché (potentiellement)

Pourquoi?



Innovations ascendantes :

1. Une innovation adaptée aux usages

2. Des effets d'échelle

Rendu possible par possibilité :

- Modification
- Partage
- Faible cout d'entrée

Donc …

Non :

1. Endroit

2. Ressources sociales :
   - grande université
   - silicon valley

4. Logiciels libres et communs

Lettre ouverte de Bill Gates :avant tout était free

February 3, 1976

An Open Letter to Hobbyists

To me, the most critical thing in the hobby market right now is the lack of good software courses, books and software itself. Without good software and an owner who understands programming, a hobby computer is wasted. Will quality software be written for the hobby market?

Almost a year ago, Paul Allen and myself, expecting the hobby market to expand, hired Monte Davidoff and developed Altair BASIC. Though the initial work took only two months, the three of us have spent most of the last year documenting, improving and adding features to BASIC. Now we have 4K, 8K, EXTENDED, ROM and DISK BASIC. The value of the computer time we have used exceeds $40,000.

The feedback we have gotten from the hundreds of people who say they are using BASIC has all been positive. Two surprising things are apparent, however. 1) Most of these "users" never bought BASIC (less than 10% of all Altair owners have bought BASIC), and 2) The amount of royalties we have received from sales to hobbyists makes the time spent of Altair BASIC worth less than $2 an hour.

Why is this? As the majority of hobbyists must be aware, most of you steal your software. Hardware must be paid for, but software is something to share. Who cares if the people who worked on it get paid?

Is this fair? One thing you don't do by stealing software is get back at MITS for some problem you may have had. MITS doesn't make money selling software. The royalty paid to us, the manual, the tape and the overhead make it a break-even operation. One thing you do do is prevent good software from being written. Who can afford to do professional work for nothing? What hobbyist can put

Wikipedia
A complementary encyclopedia project

Welcome to Nupedia!

We are building the world's largest international, peer-reviewed encyclopedia. It is free. The project is largely "on hold" but poised to get moving again with renewed vigor when funding is found.

It's not hard to get involved, and we really do need *your* involvement! Basically, we need

- writers
- editors and peer reviewers,
- copyeditors,
- programmers,
- translators, and even
- casual participants.

Just sign up (it's a very short form) and we'll get you started. Or perhaps you need to be convinced?

Nupedia's policy guidelines have been recently updated! Please have a look. We have added a FAQ that answers many of the most frequently-asked questions about Nupedia policy and procedure.

Nupedia is becoming multilingual. To discuss issues related to this, please join Interpret-L. You will be able to unsubscribe yourself from the same page. We also have groups devoted to translation into (and, later, from) French, German, Italian, Portuguese, and Spanish.

You might notice that we have changed our logo/banner slightly. Thanks go to **Sally Milo** of **Milo Design** for the update. The old subtitle for Nupedia, "The Open Content Encyclopedia," is now "The Free Encyclopedia." This is more inviting to people who do not know what "Open Content" means. It is also more inviting to people associated with Richard Stallman's Free Software Foundation (FSF). They prefer "free" (that term) to "open content" and "open source." "Free," as Stallman points out, here means not "free of charge" but instead "unconstrained by (most) legal restrictions on use." We thought it would be nice to please these people who can help Nupedia so much. This change does not represent any sort of change in policy, goals, or outlook. So you can go on referring to Nupedia as "The Open Content Encyclopedia," if you prefer, or as "The Free Encyclopedia"--it's both.

Source: wikipedia.org

Elinor Östrom

Nobel Prize in Economics

2009

Un bien commun

Communs

- Partageable
- Accessible à tous
- Géré par tous

Biens rivaux et exclusifs

	Exclusif	Non-exclusif
Rival	Bien privé • Vêtement • Voiture • Maison	Bien Commun • Court d'eau • Parcs nationaux
Non-rival	Bien sans encombrement • Television • Radio • Online News	Bien publique • Sécurité publique • Lois

Un bien commun

Communs : ressource

- Partageable
- Accessible à tous
- Géré par tous

Initialement deux modèles concurrents :

- L'entreprise
- L'état

Alternative empirique : la gestion des communs

Sources : wikipedia.org

Le problème : Tragédie des communs

Communs

- Ressource partagée (champ, pâturage, eau)
- Intérêt individuel → Surexploitation
- Coût collectif → Dégradation
- Dilemme : Comment utiliser la ressource efficacement sans la dégrader ?

Source : wikipedia.org

Solution Marché (Privatisation)

- Propriété privée → responsabilité Individuelle
- Incitation à préserver sa parcelle
- Limites :
  - Pas de coordination
  - Inégalités
  - Pas adapté aux biens indivisibles

Sources : wikipedia.org

Solution État

- Régulation centralisée
- Quotas / licences / interdictions
- Surveillance par autorités
- Limites :
  - Bureaucratie (cout surveillance)
  - info locale manquante
  - inefficacité

8 règles pour gestion des communs

1. Commons need to have clearly defined boundaries. In particular, who is entitled to access to what? Unless there's a specified community of benefit, it becomes a free for all, and that's not how commons work.

2. Rules should fit local circumstances. There is no one-size-fits-all approach to common resource management. Rules should be dictated by local people and local ecological needs.

3. Participatory decision-making is vital. There are all kinds of ways to make it happen, but people will be more likely to follow the rules if they had a hand in writing them. Involve as many people as possible in decision-making.

4. Commons must be monitored. Once rules have been set, communities need a way of checking that people are keeping them. Commons don't run on good will, but on accountability.

Source: Wikipedia.org

8 règles pour gestion des communs

5. Sanctions for those who abuse the commons should be graduated. Ostrom observed that the commons that worked best didn't just ban people who broke the rules. That tended to create resentment. Instead, they had systems of warnings and fines, as well as informal reputational consequences in the community.

6. Conflict resolution should be easily accessible. When issues come up, resolving them should be informal, cheap and straightforward. That means that anyone can take their problems for mediation, and nobody is shut out. Problems are solved rather than ignoring them because nobody wants to pay legal fees.

7. Commons need the right to organize. Your commons rules won't count for anything if a higher local authority doesn't recognize them as legitimate.

8. Commons work best when nested within larger networks. Some things can be managed locally, but some might need wider regional cooperation – for example an irrigation network might depend on a river that others also draw on upstream.

8 règles pour gestion des communs

1. Si impacté par une règle il faut pouvoir la changer
   (Auteurs = Correcteurs)

5. 6. Pouvoir de sanction décentralisé et local

(conflit local

-> changement rapide

-> relation directe qui renforce la communauté)

Source : wikipedia.org
